

TECHNICAL DATA SHEET

DIESEL SYSTEM CLEANER

DESCRIPTION

Diesel System Cleaner is a multi-purpose diesel fuel treatment that effectively cleans the whole fuel delivery system including injectors and fuel pumps extending the life of the fuel system components. It provides improved fuel economy, reduces operating cost, increases power, lowers emissions and makes starting easier.

APPLICATION

Suitable for all diesel fuel systems for rectifying problems such as difficulties with starting, irregular idling, poor throttle response, performance losses, surges due to lean mixture and poor exhaust values caused by contaminated fuel systems. For all diesel fuels and biodiesel up to max. B30 used in diesel engines of vehicles

BENEFITS

- ✓ Efficient fuel delivery system cleaning
- ✓ Removes carbon deposits as well as deposits from distributors, valves and other components of the fuel system
- ✓ Improved Fuel Economy
- ✓ Reduces maintenance cost

TYPICAL CHARACTERISTICS

Base :	Additives in carrier liquid
Color :	Yellowish
Density at 15°C :	0.800 g/cm
Flash point :	60°C

USE DIRECTION

One 250 ml can is sufficient for up to 70 liters of fuel. This product is effective over 2,000 km. Diesel Cleaner can be mixed with fuel at any time since mixing is spontaneous

The above mentioned typical data are approximate values based on current production and can be subject of allowable production tolerances
