

TECHNICAL DATA SHEET

ELECTRONIC CLEANER

DESCRIPTION

Spray Fluid suitable for cleaning electrical and electronic contacts from debris and rust. It dries quickly, leave no residue and blasts away oil, dirt, flux residue and condensation from sensitive electronics and electrical equipments.

APPLICATIONS

For use in on printed circuit boards, controls, battery terminals, switches, tape heads , precision instruments and electric panel

BENEFITS

- ✓ Very good cleaning properties
- ✓ Non-corrosive and non-conductive
- ✓ Leaves no residue

USE DIRECTION

Before use, shake the aerosol.

Hold can 15-20 cm away from the surface and spray directly on to the electronic device or circuit board to eliminate and remove any contaminants that may cause loss of electrical contact.

Only switch on the electrical installation after evaporation of the solvent (minimum of 15 min)

One 250 ml spray bottle can easy to use and store

The above mentioned typical data are approximate values based on current production and can be subject of allowable production tolerances
