

# TECHNICAL DATA SHEET

## MOTOR FLUSH

### DESCRIPTION

Motor Flush is a fluid for clearing the engine interior of troublesome deposits. Is designed to help neutralize harmful engine acids, while it works to loosen and remove sludge, varnish and gum deposits. It also improves lubrication life and protection of new oil .

### APPLICATIONS

For use in all gasoline and diesel engines, including the hybrid one. It significantly improves throttle response and acceleration of cars, trucks, buses, tractors, and other vehicles, and reduces fuel consumption and emissions.

### BENEFITS

- ✓ Complete oil system flushing
- ✓ Fast acting formula
- ✓ Compatible in petrol or diesel engines
- ✓ Reduces oil consumption

### USE DIRECTION

Add to the motor oil at operating temperature before the oil change. Then allow engine to idle for approx. 10 minutes. Then drain the used oil, replace the filter and fill in the new oil. Compatible with commercially available motor oils.

One 250 ml bottle is sufficient for 6 l of oil
