

TECHNICAL DATA SHEET

OCTANE PLUS

DESCRIPTION

Octane Plus is a combination of agents formulated according to state-of-the-art additives and fuel technology. Octane Plus is for universal use and increases the octane number (RON) of the fuel by 2-4 points, depending on the RON. The increased fuel performance prevents engine damage and the increased octane number leads to optimized engine performance and reduced fuel consumption.

APPLICATIONS

For increasing the octane number of gasoline

BENEFITS

- ✓ Increases the octane number by up to 4 points depending on the RON of the gasoline
- ✓ Increases the performance of all grades of gasoline
- ✓ No harmful effects on catalytic converters
- ✓ Cleans and protects mixture preparation systems

TECHNICAL DATA

Color :	Brown
Base :	Additives / naphtha
Density at 15 °C :	0.81 g/cm ³
Flash point :	> 61 °C
Pour point :	-45 °C
Viscosity at 40 °C :	< 7.0 mm ² /s

USE DIRECTION

One 250 ml can is sufficient for 60 l gasoline.
Pour Octane Booster into the fuel tank and then top up with fuel. Mixing takes place automatically

The above mentioned typical data are approximate values based on current production and can be subject of allowable production tolerances
