

TECHNICAL DATA SHEET

STOP SMOKE

DESCRIPTION

Stop Smoke Additive is an oil soluble supplement, designed to reduce exhaust smoke for gasoline and diesel engines burning an excessive amount of oil. It prevents black smoke and oil mist and acts against the loss in viscosity in motor oils. Oil Smoke Stop increases the compression ratio and reduces engine noise. Provides extra protection in engines with high levels of wear. Extends the service life of catalytic converters.

APPLICATIONS

For use in all petrol, LPG and diesel engines.

BENEFITS

- ✓ Prevents black smoke and oil mist
- ✓ Reduces engine noise
- ✓ Extends catalytic converters service life

USE DIRECTION

Add the entire contents of the bottle to the warm crankcase at any time including at oil change or between oil changes as required .

To obtain a good mixture with the oil after adding it, let the engine run or drive with the car for 5 minutes.

One 250 ml bottle is sufficient for 3 – 5 l of motor oil. Do not add more than 10%.

Add to the warm motor oil during every oil change and between oil changes if oil consumption is very high.

The above mentioned typical data are approximate values based on current production and can be subject of allowable production tolerances
